WORK EXPERIENCES

ONOW Myanmar Company Ltd Yangon, Myanmar

Backend Developer (Remote)

Aug 2023 – Present

- Develop and optimize server-side logic and RESTful APIs, ensuring high performance, scalability, and support for multiple client applications
- Optimize multi-tenant database queries and implement caching strategies, resulting in significant improvements in API response times and overall system performance
- Design and implement event-driven architecture for real-time message processing using Azure Event Hub, improving system responsiveness and throughput
- Implement secure authentication using JWT with encryption and decryption mechanisms, reducing unauthorized access and strengthening data security
- Build and maintain integration systems with ManyChat chatbot to automate customer interactions and streamline communication workflows
- Integrate third-party services such as email providers, Slack webhooks, and external data sources to enhance system functionality and connectivity
- Set up real-time error alerting via Slack webhooks, enabling faster incident response and improved system reliability

ONOW Myanmar Company Ltd Yangon, Myanmar

Backend Developer (Salesforce Platform)

Nov 2022 – July 2023

- Designed and implemented backend functionality for CRM applications using salesforce to improve usability and system efficiency
- Developed and maintained backend functionality on the Salesforce platform, including Apex classes, triggers, and batch processes
- Implemented integrations between Salesforce and internal/external systems via REST APIs to automate business workflows
- Ensured data integrity, optimized backend processes, and improved system performance for better user experience
- Collaborated with stakeholders to deliver scalable, maintainable, and user-friendly Salesforce solutions

Whale Cloud Technology Co.,Ltd, Yangon, Myanmar

Data Engineer/Analyst

Jan 2019 – DEC 2020

- Performed data analysis and report on results
- Developed and maintained the dashboards data quality and reports using business intelligence tools
- Wrote the SQL query for the business needed reports to aid in effective decision-making
- Supported automation of data processes to improve operational efficiency and reduce manual workload
- Collaborated with cross-functional teams to understand business needs and deliver tailored data solutions
